INTRODUCTION TO SOCIAL ISSUES

Social issues are problems that affect a large section of society. They are harmful to progress and harmony of a nation.

These include poverty, unemployment, illiteracy, child labour, gender discrimination, and environment pollution.

POVERTY AND UNEMPLOYMENT

Poverty leads to hunger, lack of shelter, and poor education.
Many families struggle to meet basic needs due to low income.

Unemployment makes this worse, especially for educated youth who cannot find suitable jobs. This creates frustration and affects the country's growth.

GENDER INEQUALITY AND WOMENS SAFETY

In many places, women are not given equal rights in education, jobs, or decision-making. They often face discrimination and safety issues. Crimes against women, like harassment and domestic violence, are still common. Promoting gender equality is necessary for a fair society.

CHILD LABOUR AND ILLITERACY

Child labour is when children are forced to work instead of going to school. This usually happens in poor families. Without education, these children remain stuck in poverty. Illiteracy stops them from having a better future and weakens the country's development.

ENVIRONMENTAL DEGRADATION

Pollution, deforestation, and climate change are harming the environment. These issues affect air, water, and soil, and can cause health problems. People need to protect nature by using resources wisely and reducing waste. A clean environment is essential for a healthy life.

ROLE OF CITIZENS AND YOUTH

Every citizen plays a role in solving social problems. The youth especially can bring change through awareness, volunteering, and innovation. They can start campaigns, educate others, and support green initiatives. Their energy and ideas are powerful tools for progress.

CONCLUSION

Social issues affect millions of people and hold back our progress. Problems like poverty, Illiteracy, and pollution need immediate attention.

We must work together to create a better, equal, and safer society. Everyone's efforts can bring real change.
